## EXPERIENCE

**Aiikii** - *Snr. Mobile Front-End Developer*

**February 2023 - PRESENT**

**Technologies** - ReactNative, NuxtJs, Saas, CSS, HTML5, Tailwind v3, GitLab, CircleCi, mocha, jest, Webpack, Gulp, npm, Yarn,

- Spearheaded the establishment of robust test environments, yielding a seamless integration and development process with a 20% reduction in deployment errors.
- Crafted user-friendly UI screens for a mobile application utilizing expo, TypeScript, and React Native hooks, resulting in a 50% surge in user engagement.
- Actively participated in over 50 code reviews, consistently providing insightful constructive feedback that enriched team code quality.
- Expertly resolved and debugged 100+ issues, ensuring consistent high-performance levels and delivering an optimal user experience.
- Collaborated with cross-functional teams to troubleshoot issues and elevate application performance, leading to a remarkable 90% decrease in reported application crashes.
- Masterfully integrated complex third-party APIs for payments into existing customer solutions, achieving a remarkable payment processing success rate of 98.3%.

**Access Holdings** - *Snr. Front-End Web Developer*

**October 2022 - January 2023**

**Technologies** - ReactJs, Saas, CSS, HTML5, Tailwind v3, GitLab, Webpack, Gulp, npm, Yarn.

- Engineered a highly secure and interactive web application employing a modern front-end framework and an intuitive user interface, resulting in a 30% upswing in engagement and a notable 40% decrease in security vulnerabilities.
- Proactively stayed updated on emerging web technologies and industry trends, attending 10+ industry conferences and workshops to remain at the vanguard of advancements in the field.
- Optimized the front-end user interface, leading to a significant 30% increase in user engagement based on comprehensive user research.
- Devised front-end architecture that Improved website scalability and performance.
- Overhauled the UI architecture for five online banking projects, ultimately enhancing performance and leading to an increased frequency of app usage.

**3niti X** - *Snr. Frontend Developer (remote)*

**JANUARY 2022 - PRESENT**

**Technologies** - ReactJs, Saas, CSS, HTML5, Tailwind v3, GitLab Webpack, Gulp, npm, Yarn.

- Rectified over five site-critical bugs, enhancing the user experience and accelerating application performance.
- Actively contributed to the modernisation of a government tourism website, resulting in a notable 25% increase in user interaction and a 15% improvement in site loading speed.
- Skillfully strengthened the existing codebase with intricate adjustments and updates, maintaining code integrity and logic for a web-based frontend application, ultimately reducing system crashes by an impressive 20%.
- Elevated frontend data structures and reduced API calls, resulting in a 40% increase in system performance.
- Developed reusable components shared across two air travel web applications.

**Econnect NetPower** - *Snr. Front-End Web Developer*

**OCTOBER 2021 - AUGUST 2022**

**Technologies** - ReactJs, VueJs, WordPress, NuxtJs, NextJs, Django, Bootstrap5, Saas, CSS, HTML5, Tailwind v3, nvm, GitLab, CircleCi, mocha, jest paystack, flutterwave, stripe, bitrix24.

- Upgraded the legacy frontend codebase to a more current node version.
- Occupied a key role in driving the establishment of micro frontends for the shared codebase, streamlining development processes and accelerating project timelines, leading to an impressive 25% reduction in feature implementation time.
- Assumed a critical role in crafting Figma designs, which led to an enhanced User Experience (UX) and contributed significantly to a 20% upsurge in user satisfaction.
- Led and mentored a team of 4 developers, successfully delivering my inaugural web application for the travel industry within a tight 3-month timeline.
- Collaborated on the implementation of continuous integration and deployment pipelines for the frontend codebase, resulting in a remarkable 30% reduction in deployment times and a significant 15% decrease in production issues.

**DemzAnalytics** - *Frontend Developer/ Web Designer (remote)*

**JANUARY 2020 - SEPTEMBER 2021**

**Technologies** - VueJs, Bootstrap5, Saas, Css3, HTML5, Tailwind v3, github, WordPess, shopify, dialogueFlow, Material User Interface(MUI).

- Transformed Figma designs into User Interfaces (UI) for a house leasing web application.
- Constructed a chatbot that remains in use by the team to date.

- Developed websites using content management software (WordPress).
- Initiated projects and selected frontend technologies.
- Integrated with third-party APIs as well as APIs built by the team.

**Neo2Analytics** - *Intern / Jnr. Web developer*

**MARCH 2017 - DECEMBER 2019**

**Technologies** - JavaScript, WordPress, PHP, python, HTML5, github, shopify, magento.

- Collaborated in conducting comprehensive user research for an eCommerce website, contributing insights that led to a notable 15% increase in conversion rates.
- Successfully completed a web design prototype, receiving accolades from the design team for its precision and resulting in a considerable 10% reduction in design iteration time.
- Played a pivotal role in creating and procuring graphic images, greatly enhancing the visual appeal of the website and leading to a substantial 20% increase in user engagement.
- Concluded a comprehensive 6-month web developer course.

## EDUCATION

**University of Lagos** - *B. Sc Industrial Relations and Personnel Management*

*SEPTEMBER 2014 - NOVEMBER 2019*

**UDEMY** - *Web developer 2.0, Brad Traversy React Front to Back, Brad Traversy MERN Stack course, Brad Traversy eCommerce Web app.*

**eDX** - *Harvard CS50 Intro to Computer Science, Harvard CS50 Game Development.*

**UDACITY** - *Introduction to Python*
